Art Unit: 1651

1. Receipt is acknowledged of the prior art information disclosure statement filed September 24, 2003.
2. Claims 1-11 are pending in this application, which is a CIP of Ser Number 10/424,517, filed April 28, 2003.
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention with respect to the following:

 - a. The statement in claim 1 that "the PLD enzyme is of the genus *Streptomyces*" which statement appears to be in error.
 - b. There is missing information pertaining to the strain.
4. Claims 1-11 are rejected under the judicially created doctrine of double patenting over claims of U. S. Patent No 6,878,532 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter.

Art Unit: 1651

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1651

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by Kokusho et al, U.S. 4,783,402 which reference teaches the production of exchanging a base for production of phospholipids which includes phosphatidylserine formed by a reaction of a PLD enzyme in the presence of an alcohol in a solvent.

Or, in the alternative:

Claims 1-11 are rejected under 35 U.S.C. 103(a) as obvious over Kokusho et al, U.S. 4,783,402 further in view of Yamane et al, U.S. 6,660,504 or Kirschner et al U.S. 6 The factual inquiries set forth in Graham v. John Deere Co., 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1651

Kokusho et al does not teach an enzyme obtained from Streptomyces but Yamane et al or Kirschner teaches PLD enzymes which enzymes would have been prima facie obvious to substitute for those of Kokusho et al absent unexpected or unobvious process steps for the method of combining a phospholipids with a hydroxyl containing compound based on the broad disclosure of the reference.

If there are any differences with respect to any other processing conditions, these differences would have been prima facie obvious in view of the broad disclosure of Kokusho et al to produce the phosphatidyl product absent unexpected and unobvious process steps.

7. **No claim is allowed.**

8. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
